

Joining the "Turkic Author Authority System"

Requirements for joining the "Turkic Author Authority System"

To join the "Turkic Author Authority System," an author or publisher must submit an application (in free-form format) containing a link to the publication online; if the publication is not available online (or is inaccessible), the work itself must also be submitted for deposition on the website of the International Academy of Systemology.

Criteria for joining the "Turkic Author Authority System"

Any scholarly work of any genre by any author—whether published, deposited on any storage medium, or otherwise publicly displayed or made public—may be included in the "Turkic Author Authority System." A fundamental requirement for calculating an author's rating is unrestricted access to the work.

Publications of any genre falling into one of the following categories may be included in the rating:

1. Research papers that clearly define:
the object of study,
the purpose of the publication,
the relevance of the publication and/or the novelty of the research,
the breadth and depth of the study's scope regarding the object, and/or a detailed description of the research methodology.
2. Analytical papers that rigorously and comprehensively analyze research results.
3. Review papers that clearly outline the scope and depth of the topic and the comprehensiveness of the coverage of the reviewed works.

A review must classify at least nine of the sources included in it. The total volume of quoted text must not exceed 30 percent of the review's total length.

4. Foundational works that identify a problem and/or possess prognostic value.

Upon the written proposal of a representative from any publication, publishing house, studio, laboratory, or similar entity, all authors (including future ones) associated with that entity may be included in the "Turkic Author Authority System."

Works published at congresses, in publications, or on other platforms of the International Academy of Systemology—as well as those from other authors and organizations that have joined the "Turkic Author Authority System"—are processed automatically by the system.

Parameters for calculating author ratings

The parameters are distributed across 10 categories. Numerical values from the Fibonacci sequence are used to quantify these parameters.

Parameter categories for calculating author authority ratings:

10. Scholarly monographs registered in the "Turkic Author Authority System." – **55 points.**
9. Authors' scholarly publications in journals registered in the "Turkic Author Authority System." – **34 points.**
8. Scholarly publications submitted by authors for registration in the "Turkic Author Authority System" that appear in journals published within the Turkic territorial-economic and socio-cultural region. – **21 points.**

7. Video and audio publications by authors on online platforms registered in the "Turkic Author Authority System." Links to the authors' scholarly publications in journals registered in the "Turkic Author Authority System," as well as to monographs registered in this system. – **13 points**.

6. Appearances on online platforms registered in the "Turkic Author Authority System" (as a speaker in discussions and/or as a host/moderator). Citations of the authors' scholarly publications in journals within the Turkic territorial-economic and socio-cultural sphere, as well as citations of monographs published within that sphere. – **8 points**.

5. Video and audio publications submitted by authors for registration in the "Turkic Author Authority System" on online platforms within the Turkic territorial-economic and socio-cultural sphere. References to scholarly monographs by any authors concerning subjects and events within the Turkic territorial-economic and socio-cultural sphere. – **5 points**.

4. Contributions to online discussions regarding the Turkic territorial-economic and socio-cultural sphere, submitted by authors for registration in the "Turkic Author Authority System." References to scholarly publications by any authors in any outlets concerning subjects and events within the Turkic territorial-economic and socio-cultural sphere. – **3 points**.

3. Video and audio publications submitted by authors for registration in the "Turkic Author Authority System" that appear on online platforms outside the Turkic territorial-economic and socio-cultural space. References to scholarly monographs by Turkic authors—including translations—published outside the Turkic territorial-economic and socio-cultural space. – **2 points**.

2. References to official documents of Turkic state and public entities. – **1 point**.

1. Topics of debate contributions on online platforms outside the Turkic territorial-economic and socio-cultural sphere, submitted by authors for registration in the "Turkic Author Authority System." References to scholarly publications by Turkic authors in other outlets. – **1 point**.

The ranking is published and updated quarterly—starting October 1, 2026—on the International Academy of Systemology's website (<https://usakad.info/TBSS/>) and YouTube channel (<https://www.youtube.com/@usakad>).
